PREFACE

South Australian Economic Indicators is a monthly publication which contains the latest available data at the time of preparation for a range of statistical series that have been identified as indicators of economic activity in this State. In a number of cases the figures presented are preliminary and subject to revision in subsequent issues.

Written and graphic commentary have been included for many of the selected series and analysis has been augmented with the calculation of the percentage change from the previous reference period together with the presentation of comparative Australian data. Time series information has been included to provide a historical perspective on many of the selected indicators. Future issues may be expanded to include further historical data in response to expressed user needs. This product is under continuous review and any suggestions for enhancement will be welcomed.

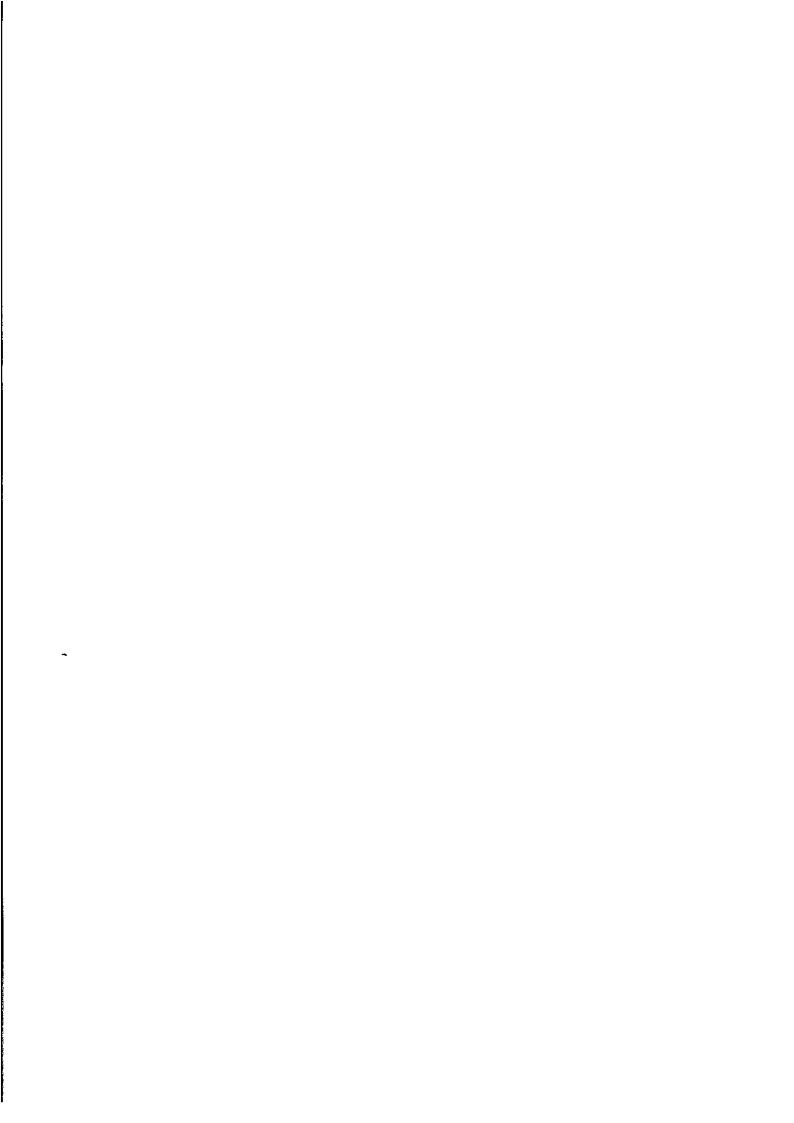

More detailed information on each series (including explanatory and technical notes) can be obtained from other Australian Bureau of Statistics publications or alternative data sources. To assist those seeking further information a source publication for each of the series has been documented in the statistical summary.

This issue includes a special article entitled Superannuation. Future issues will contain further articles on statistical topics which concentrate on longer term trends or other issues pertinent to the South Australian economy.

If you have any inquiries concerning this publication please contact the editor, Brian Moody, telephone (08) 237 7315. All requests for statistical information should be directed to the ABS Information Service, ~GPO Box 2272 Adelaide SA 5001, telephone (08) 237 7100.

REVIEW

Overview

- Labour force estimates for July 1994 indicate that the underlying trend for total employed persons in South Australia has been increasing since March 1994 while the trend unemployment rate has been moving downward throughout 1994.
- The June 1994 trend estimate for total dwellings approved in South Australia indicates a rise in this series for the fifth consecutive month.
- The value of overseas exports of South Australian produced commodities during 1993-1994 was 3.0% higher than the level for the previous financial year.
- The trend estimate for June 1994 retail sales for South Australia was 0.2% below the May figure. This continued the downward movement of the last five months following moderate growth during 1993.
- The provisional trend estimate for new motor vehicle registrations in July 1994 was 2.1% above the June figure continuing the upward movement evident for the past 9 months.
- In the June quarter 1994 the all groups Consumer Price Index (CPI) for Adelaide rose 0.7%, resulting in an annual increase of 1.9%.
- Over the 12 months to June 1994, the weekly award rates of pay index for full-time adult employees in South Australia increased by 1.3%
- Total housing finance commitments for owner occupied dwellings in June 1994 were 2.3% higher than in May.

State Accounts

Gross State Product

The March quarter growth in GSP (trend estimates expressed in current prices) was 0.2%, the second lowest of all States and Territories. Growth in GSP continued to decline from the relatively strong growth experienced during most of 1992-93. Growth in GDP for Australia rose 1.5% for the corresponding period.

Growth over the year to March quarter 1994 was 3.1%, approximately one-half of the Australian average (6.0%).

Falls in wages, salaries and supplements (-0.7%) and indirect taxes less subsidies (-0.5%) have contributed to the low growth in GSP for the March quarter 1994. The gross operating surplus component of GSP has maintained steady growth with the March quarter increasing by 1.6%.

State Final Demand

State Final Demand (trend estimates in 1989-90 prices) increased 0.9% during March quarter 1994 to be 2.8% higher than the March quarter 1993. Although below the Australian average of 1.3%, SFD has steadily increased since the March quarter 1993.

Increases in private final consumption expenditure (1.4%) and public final demand (1.4%) were tempered by a fall in private capital expenditure (-2.9%). The fall in private capital expenditure was broad-based, with all major components (except real estate transfer expenses) declining by between 3.0% and 3.6%.

Both public final consumption expenditure and capital expenditure contributed to the increase in public final demand, increasing by 1.0% and 3.6% respectively.

International Accounts

Exports

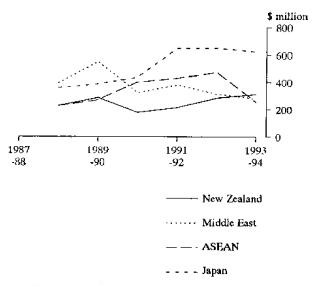

Overseas exports of South Australian produced commodities during 1993-94 were valued at \$3,873.1 million which was 3.0% higher than the level for the previous financial year. During the year metals and metal manufactures constituted 11.7%; cereals and cereal preparations 11.2%; meat and meat preparations, 8.4%; and road vehicles, parts and accessories, 9.1% of total exports.

Exports to Japan accounted for 16.1% of the total during the period, followed by ASEAN countries (13.6%) and the United States (10.1%).

Imports

Overseas imports into South Australia during 1993-94 (compiled from import documents lodged in South Australia) were valued at \$2,803.4 million, 8.6% below the level for the previous financial year. Road vehicles, parts and accessories constituted 23.7%; machinery 21.2%; petroleum and petroleum products, 14.4%; and chemicals 7.1% of total imports.

MERCHANDISE EXPORTS BY COUNTRY

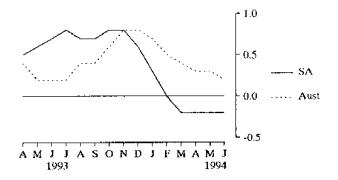

Consumption and Investment

Retail Turnover

Trend estimates indicate that June 1994 retail sales for South Australia have declined 0.2% from May. This compares with a rise of 0.2% in the Australian figure. The South Australian trend has been downward for the last five months following moderate growth in 1993. The retail turnover estimate in original terms for South Australia was \$628.2 million for June, an increase of 0.8% on the May level of \$623.2 million. In seasonally adjusted constant price terms the estimate for the June quarter 1994 rose by 1.9% from the corresponding quarter of the previous year.

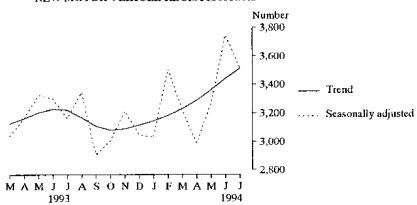

RETAIL TURNOVER
PERCENTAGE CHANGE FROM PREVIOUS MONTH
TREND ESTIMATES

New Motor Vehicle Registrations

The provisional trend estimate for new motor vehicle registrations in July 1994 was 2.1% above the June figure continuing the upward movement evident now for 9 months. The seasonally adjusted estimate for July 1994 fell 6.2% from June 1994 but was 11.1% above the July 1993 figure. In original terms there were 3,393 new motor vehicles registered in July 1994, 15.6% less than June 1994 but 6.5% higher than July 1993. For new passenger vehicles only, the leading makes registered in July 1994 were Holden (768 vehicles), Ford (616), Mitsubishi (527), Toyota (373) and Mazda (104).

NEW MOTOR VEHICLE REGISTRATIONS

Tourist Accommodation

When the March quarter 1994 is compared with the March quarter 1993, the number of bed spaces available in visitor hostels increased by 6.5% from 1,970 to 2,098. Guest nights occupied in visitor hostels rose by 13.5% from 59,084 to 67,089 and the bed occupancy rate increased from 33.6% to 35,5%. Guest arrivals fell from 32,142 to 31,479 but the average length of stay increased from 1.8 days to 2.1 days. Accommodation takings rose from \$0.60m to 0.67m while average takings per guest night rose from \$10 to \$11.

Private New Capital Expenditure

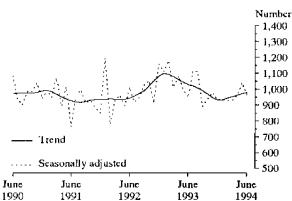

Private new capital expenditure in South Australia for the March quarter 1994 was \$341.7 million, a increase of 3.9% from the previous quarter. New buildings and structures accounted for \$114.4 million while equipment, plant and machinery amounted to \$227.3 million. In the December quarter 1993 survey, businesses provided expectations of new capital expenditure for the six months to June 1994. By adding the estimate to actual expenditure incurred in the September and December quarters of 1993, estimates for the 1993-94 financial year have been compiled. These estimates provide a good indication of the likely outcome for the year. The expected new capital expenditure for 1993-94 is \$1,529 million, compared with actual expenditure in 1992-93 of \$1,513 million.

Production

Dwelling Approvals

The trend estimate for total dwellings approved in South Australia continued to rise with the June estimate of 994 being 1.8% higher than the (revised) preceding month. This represents the fifth consecutive monthly increase of this indicator. Strength in both the housing and other residential sectors was responsible for the relatively large number of dwellings (1,179 in unadjusted terms), being approved in June. The Australian trend estimate for total dwellings grew by 1.1% in June to 16,076, the highest monthly figure recorded for this series.

DWELLING UNITS APPROVED

Dwelling Commencements

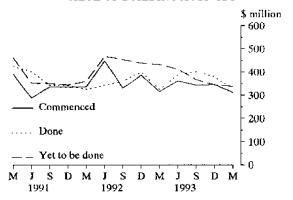

With the release of the March quarter 1994 Building Activity data the South Australian estimate of dwelling units commenced in the quarter has been amended to 2,549 (preliminary estimates were 2,556). The Australian estimate has been revised upward slightly to 40,864 but this still represents an 8.1% fall from the December level. During the March quarter most States experienced reductions in the number of houses commenced and while there was an increase in the number of other residential units commenced in some States (ACT, Victoria, SA and WA) it was not enough to stop an overall decline in commencements being recorded.

Value of Non-residential Building Approvals In June 1994 the value of non-residential building approved was \$31.3 million in South Australia and \$1,164.4 million Australia-wide. The national figure was influenced noticeably by the inclusion of the Melbourne casino project which had an approval value in excess of \$500 million. As a consequence of this the South Australian share of national non-residential approvals fell to 2.7%.

Value of Total Building Activity

The total value of building work commenced during the March quarter 1994 was \$312.0 million in South Australia and \$6,520.9 million Australia-wide. Both values are lower than in the previous quarter. Similarly the value of building work done dropped in the March quarter, with the South Australian estimate of \$328.6 million being 13.3% down and the Australian figure of \$5,842.8 million 13.9% lower than in the December quarter. The value of work yet to be done on jobs under construction at the end of the quarter in South Australia was \$336.9 million while \$8.631.0 million was outstanding nationally.

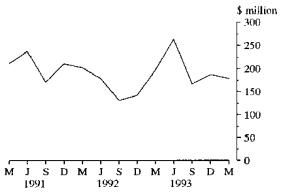

VALUE OF BUILDING ACTIVITY

Value of Engineering Construction

The March quarter 1994 estimate for the value of engineering construction work done in South Australia was \$179.2 million, a decrease of 4.6% from the revised December estimate of \$187.8 million. The Australian estimate also fell slightly, by 0.5% to \$3,006.4 million. In South Australia the greatest movements between the quarters were recorded in the roads, highways and subdivisions category (from \$61.7 million in December to \$72.0 million in March) and in the heavy industry (oil, gas etc.) category which dropped from \$17.3 million to \$9.2 million in the March quarter.

VALUE OF ENGINEERING CONSTRUCTION WORK DONE

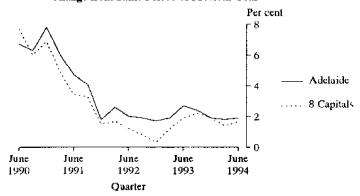

Prices

Consumer Price Index

In the June quarter 1994 the all groups Consumer Price Index (CPI) for Adelaide rose 0.7%, resulting in an annual increase of 1.9%. Nationally prices also rose 0.7% for the quarter and 1.7% on an annual basis.

Australia's Consumer Price Index compares favourably with many of its international trading partners. For the all groups index excluding housing for the year ended March quarter 1994, the annual percentage change for Australia was 1.8%, compared with USA 2.1%, Japan 1.0%, UK 2.9%, Hong Kong 6.6%, Korea 6.8% and New Zealand 0.4%.

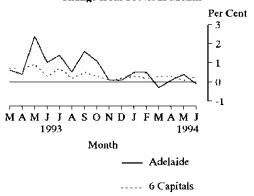

CONSUMER PRICE INDEX Change from Same Period of Previous Year

House Building Materials

Prices of house building materials in Adelaide increased by 0.4% over the three months to June 1994 compared with a rise of 0.8% nationally. On an annual basis, Adelaide prices rose 6.1% compared with 3.7% nationally.

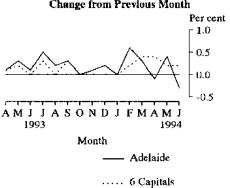

MATERIALS USED IN HOUSE BUILDING Change from Previous Month

Non-house Building Materials

Over the three months to June 1994 prices of materials used in building other than house building remained steady in Adelaide, compared with a rise of 0.7% for the weighted average of the six State capital cities. In Adelaide the items with the greatest price movement over the three months were ready-mixed concrete for which prices rose 4.7% and steel decking and cladding for which prices rose 3.3%, while prices for paint and other coatings fell 3.6%.

MATERIALS USED IN BUILDING OTHER THAN HOUSE BUILDING Change from Previous Month

House Prices

In the March quarter 1994 prices of established houses rose 2.0%, while nationally prices rose 1.1% in the quarter. Prices for project homes rose 1.5% in Adelaide, while nationally prices rose 0.4%. For the year ended March, established house prices in Adelaide fell 0.5% (Canberra was the only other capital to experience a fall), while prices of project homes rose 7.2%, (Darwin being the only capital to have a larger rise).

Labour Force and Demography

Population

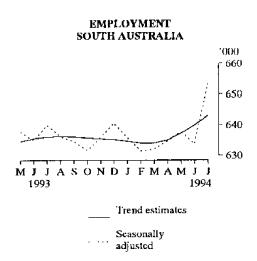

The estimated resident population of South Australia increased by 1.444 persons during the December quarter 1993 to 1,466,523. South Australia experienced a natural increase of 2,008 persons, a gain partially offset by a net interstate migration outflow of 689 persons.

The net gain from overseas migration of 125 persons in the December quarter was 786 lower than in the previous quarter.

Employment

The underlying trend estimate for employed persons in South Australia has been increasing over the past 4 months. The July 1994 estimate (643,000) is 6,900 more than the level of 12 months ago.

The underlying trend estimate of employed persons in Australia has been increasing since February 1993, reaching 7,919,400 in July 1994. The full-time employment estimate has increased by 2.5% in the past 12 months. For the same period, the part-time employment estimate has increased by almost 6%.

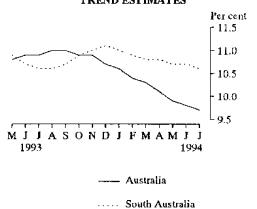

Unemployment

The trend unemployment rate for South Australia has decreased during 1994 and was 10.6% in July. The trend unemployment rate for males decreased to 10.8% (from 11.0% in June 1994), while the rate for females increased to 10.5% (10.3% in June 1994).

In July 1994, the trend estimate of the unemployment rate for Australia decreased to 9.7%, continuing a downward movement evident since October 1993.

UNEMPLOYMENT RATES TREND ESTIMATES

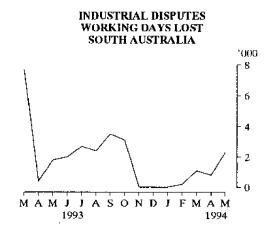

Overtime

The proportion of employees who worked overtime in South Australia in May 1994 was 17.3%, compared with 16.9% in May 1993.

Industrial Disputes

There were 2,300 working days lost through industrial disputes in South Australia in May 1994. This was 9.8 per cent of the national total.

For the 12 month period to May 1994, 18,100 working days were lost in South Australia through industrial disputation.

Short-term Overseas Visitors Arrivals Short-term visitor arrivals to South Australia in May 1994 fell 41.0% from the April 1994 figure to a total of 3,461 but this was 2.0% above the May 1993 total.

Total short-term visitor arrivals to Australia in May 1994 numbered 214,942. This was 15.8% lower than the previous month and 0.7% higher than in May 1993. The trend estimate for arrivals of overseas visitors in May 1994 was 0.2% higher than in April 1994.

The State or Territory of stay of overseas visitors is determined from the intended address reported on arrival in Australian ports and airports. A short-term visit is any intended length of stay of less than 12 months.

Short-term Resident Departures

Short-term departures of South Australian residents in May 1994 decreased 15.3% from April to 9,025 and were 14.0% fewer than in May 1993.

Departures of Australian residents in May 1994 fell to 184,536, a decrease of 0.3% from April and 0.3% lower than the May 1993 figure. The trend estimate for May 1994 remained virtually unchanged from April 1994.

Incomes

Average Weekly Earnings

Average weekly ordinary time earnings of adult full-time employees in South Australia increased (from \$597.30 in February 1994) to \$599.80 in May 1994. Male full-time ordinary time earnings increased to \$622.90 in May 1994, compared with \$619.90 for the previous quarter. The comparable level for females was \$551.40 in May 1994, up from \$548.80 in the previous quarter.

Average weekly total carnings for all employees in South Australia amounted to \$504.80, down from \$512.80 for the previous quarter.

Since it is an average of earnings across all employees, changes in average weekly earnings may occur through changes in employment as well as changes in pay levels.

Award Rates of Pay

Over the 12 months to June 1994, the weekly award rates of pay index for full-time adult employees in South Australia increased by 1.3%.

The largest annual movement of the index for full-time adult male employees occurred in the construction, and wholesale and retail trade industries with a 3.3% increase since June 1993. For adult females, employed full-time, wholesale and retail trade was the most prominent, with a 2.2% increase between June 1993 and June 1994.

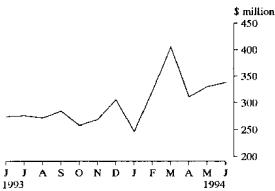

Financial Markets

Housing Finance

Total housing finance commitments for owner occupied dwellings increased slightly during the month of June to \$338.5 million compared with \$332.1 million in May 1994.

This increase was due to a relatively significant increase in financing commitments for the purchase of established dwellings. This component of total housing finance was up \$13.8 million (6.9%) to \$212.4 million in June 1994 (the second highest value recorded, the highest being \$259.8 million in March 1994). In comparison, financing commitments for both construction of dwellings and purchase of newly erected dwellings fell slightly from \$58.4 million to \$55.3 million and \$20.4 million to \$18.7 million respectively.

SECURED HOUSING FINANCE COMMITMENTS TO INDIVIDUALS SOUTH AUSTRALIA

Personal Finance

In June 1994, total personal finance commitments totalled \$167.1 million. This was an increase of \$7.5 million (4.7%) on May 1994 and was the highest value ever recorded. The previous highest was \$164.6 million in June 1993.

Personal finance commitments under total fixed loan commitments increased \$9.9 million (8.8%) to \$122.8 million in June 1994. Of the various components of this category, 'refinancing' was by far the largest contributor to this total (up \$7.6 million). This was followed by 'used motor cars and station wagons' (up \$2.9 million).

Despite the overall increase in personal finance commitments, personal finance commitments under revolving credit commitments experienced a slight decrease of \$2.5 million (5.3%) in June 1994.

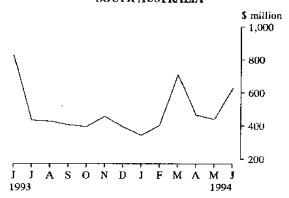

Commercial Finance

Total commercial finance commitments made by significant lenders increased from \$440.1 million in May 1994 to \$625.6 million in June 1994. This increase was recorded for both commitments under fixed loan facilities and commitments under revolving credit facilities.

In June 1994 commercial finance commitments under fixed loan facilities were up \$44.9 million (15.6%) on May 1994 figures. The most significant increases were recorded within the 'finance, investment and insurance' industry (up 103.1%), the 'transport and storage' industry (up 47.8%) and the 'community services' industry (up 32.2%).

Commercial finance commitments under revolving credit facilities increased significantly from \$152.9 million in May 1994 to \$293.4 million in June 1994. The biggest increases were seen in the industries of 'manufacturing' (up \$97.2 million), 'public administration' (up 20.0 million) and 'finance, investment and insurance' (up 17.3 million).

COMMERCIAL FINANCE COMMITMENTS SOUTH AUSTRALIA

Lease Finance

The value of goods under new finance lease commitments totalled \$36.9 million in June 1994. This was an increase of \$13.6 million (58.4%) on May 1994 and \$10.4 million (39.5%) on June 1993.

The most significant increase occurred in the category of 'total motor vehicles' up \$7.6 million (49.7%) to \$22.9 million in June 1994. This was followed by increases in finance lease commitments for 'electronic data processing equipment' (up \$2.6 million) and 'construction and earthmoving equipment' (up \$2.3 million).

FOCUS

Superannuation

Introduction

The Australian Bureau of Statistics (ABS) conducted a survey as a supplement to the November 1993 Labour Force Survey in which persons aged 15 to 74 were questioned about their present and former participation in superannuation schemes. A person was regarded as being 'covered' by superannuation if that person belonged to a scheme to which contributions were being made. Earlier surveys had been conducted in 1988 and 1991.

This survey found that some 80 per cent of Australia's 7.6 million employed persons were covered by a superannuation scheme. Of the various categories of employed persons, superannuation coverage was highest for employees (89%) compared with employers (55%) and self-employed persons (37%). For South Australian employed persons, the proportions were slightly higher with overall coverage at 82%; employees, 91%; employers, 57%; and self-employed, 42%.

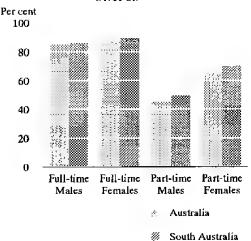

Superannuation Coverage

November 1988 to November 1993

Between November 1988 and November 1993, superannuation coverage of employed persons in Australia increased by 29 percentage points. In November 1993, 80% of employed persons were covered by superannuation. This was an increase from 71% reported in 1991 and 51% in 1988. In South Australia coverage rose from 48% in 1988 to 82% in 1993.

Nationally, coverage for female full-time workers increased between 1988 (47%) and 1993 (87%), to match that of male full-time workers (85% in 1993). The respective percentages for South Australia were 38, 89 and 86.

EMPLOYED PERSONS AGED 15 TO 74:SUPERANNUATION COVER BY FULL-TIME AND PART-TIME EMPLOYMENT STATUS

For part-time workers, the coverage rate for females jumped to 65% in 1993 from 19% in 1988. For males the coverage rate increased from 20% to 45% over the same period. For South Australia the movements were much greater with the percentage of female part-time workers rising from 17% to 70% and male part-time workers from 10% to 49%.

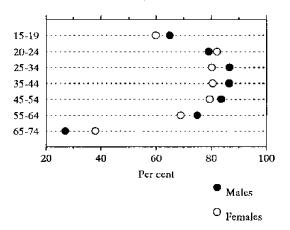

In 1993, 54% (53% in SA) of all persons who had superannuation coverage made personal contributions to a superannuation scheme. The remainder had all of their contributions made by their employer.

Employed persons

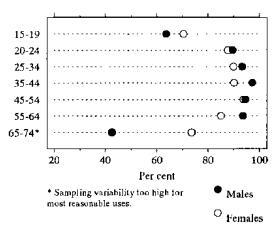

In November 1993, the national level of superannuation coverage for employed males (82%) was marginally higher than that recorded for employed females (78%). In South Australia the respective levels of coverage were 82% and 81%. Although females had higher coverage rates in both the full-time and part-time employment categories, males had a higher rate on average because of their greater proportion of full-time workers.

Superannuation coverage throughout Australia was generally above 80% for employed persons aged 20 to 54 years (83% overall). For those employed persons aged 55 to 64 years 73% were covered by superannuation, and for those aged 15 to 19 years the coverage was 63%. The charts below which provide Australian and South Australian details respectively, indicate a higher than national level of coverage for this State in each age group.

EMPLOYED PERSONS AGED 15 TO 74: AGE AND PROPORTION COVERED BY SUPERANNUATION, AUSTRALIA

EMPLOYED PERSONS AGED 15 TO 74: AGE AND PROPORTION COVERED BY SUPERANNUATION, SOUTH AUSTRALIA

The level of superannuation coverage for employed persons who were Australian born was similar to that for those born overseas in main English speaking countries (81% and 83% covered respectively). However, superannuation coverage was lower (76%) among those employed persons born in other countries.

The electricity, gas and water and communication industries recorded the highest levels of superannuation coverage, with 98% of all persons employed in both of these industries covered. The lowest coverage was recorded in the agriculture, forestry, fishing and hunting industry in which just under one-half (49%) were covered.

Among occupation groups, persons employed as para-professionals had the highest level of coverage (93%), followed by professionals (87%) and clerks (87%). The occupation groups with the lowest levels of superannuation coverage were salespersons and personal service workers, and managers and administrators (72% and 70% respectively).

South Australian employed persons tended to have a higher level of coverage than the national average in most categories including overseas born, industries and occupation groups.

Employees

For employees, the level of superannuation coverage in the public sector was 8 percentage points higher than that reported for the private sector *i.e.* 94% compared with 86%.

Superannuation coverage among permanent employees was one and a half times the level of casual employees (95% compared with 64%). Among permanent full-time employees, 96% had superannuation coverage compared with 91% of permanent part-time employees. For casual part-time employees, superannuation coverage was 58%.

Superannuation coverage among those employees who belonged to a trade union was 96%, compared with 84% for those who did not belong to a trade union.

The level of superannuation coverage tended to be higher as earnings increased. Of employees earning less than \$200 per week 53% were covered by a superannuation scheme. For those earning between \$200 and \$400 per week the level of coverage was 86% and for those earning more than \$400 per week the level was 96%.

Employees Covered by a Superannuation Scheme

Of the 4.7 million full-time employees covered by a superannuation scheme in November 1993, 45% (2,127,300) had their employer paying all contributions to that scheme. In comparison, of the 958,400 part-time employees covered by superannuation. 75% (715,000) had their employer paying all contributions.

For those 2.8 million employees who contributed personally to a superannuation scheme, 70% were covered by a scheme provided to them by their current employer. A further 27% made contributions to a scheme they had privately arranged.

Of those who were making personal contributions to a superannuation scheme, more than one-half (55%) contributed less than 5% of their earnings while more than one-third (35%) contributed between 5 and 10%.

Of the 1.5 million employees aged 45 to 74 years and covered by a superannuation scheme, 59% made personal contributions to that scheme. Almost all (97%) of these employees had been in a superannuation scheme for one year or more. Of these 860,000 employees, 481,200 expected to receive a lump sum only on retirement and

157,400 expected to receive both a lump sum and a pension.

Some 42% of employees aged 45 to 74 who made personal contributions to a superannuation scheme expected superannuation to be their main source of income after they ceased full-time work. A further 21% expected a government pension to be their main source of income and another 13% did not know what they expected to be their main source of income after ceasing full-time work.

EMPLOYEES AGED 45 TO 74, WHO MADE PERSONAL SUPERANNUATION CONTRIBUTIONS EXPECTED MAIN SOURCE OF INCOME AFTER CEASING FULL-TIME WORK BY USUAL GROSS WEEKLY PAY

	Gross	weekly pay	(S)
Expected main source of income	Under 400	400 and under 800	800 and over
		Per cent	
Australia:			
Superannuation	19.3	40.9	56 9
Govt Pension	34 1	24.7	68
Someone else's income	15.3	6.2	2.3
Did not know	149	13.3	10 1
Other	16 4	14.9	23.9
South Australia:			
Superannuation	15.2	36.9	68.2
Govt Pension	50.6	32.4	5.4
Someone else's income	16.6	9.4	1.3
Did not know	7.8	8.5	5.3
Other	9.8	12.8	19.8

For lower income earners, superannuation was less likely to be the expected main source of income. For employees earning less than \$200 per week, 11% expected superannuation to be their main source of income compared with 30% for those earning between 200 and less than \$600 per week and 54% for those earning \$600 or more per week.

Persons not Covered by a Superannuation Scheme

Of those not covered by a superannuation scheme, 1.8 million persons (or 30% of all persons not covered) had been covered previously. Some 1,075,100 of these persons had been in that superannuation scheme for 1 year or more and received a lump sum payment. There were 273,200 persons who had received such a payment in the last 2 years.

Males were more likely than females to have preserved some benefits (61% compared to 49%). Of the 430,300 males and 470,200 females aged 15 to 54 years who had previously been in a scheme for one year or more, 200,300 males had preserved the benefits in a superannuation scheme and a further 63,700 males had rolled over a lump sum. In comparison, 187,500 females had preserved some benefits in a superannuation scheme and 42,000 had rolled over a lump sum.

Data Availability

More detailed information concerning this survey has been included in the publication, Superannuation Australia, November 1993 (6319.0). The ABS has a wide range of unpublished data available from this survey which may be provided upon request at any ABS office. Inquiries in South Australia should be referred to Arnold Strals on (08) 237 7365.

(a) From September quarter 1992, caravan parks sites etc permanently reserved but only casually occupied by their tenants have been recorded continuously as site nights occupied irrespective of whether the tenants of individual sites were in residence on any particular night. Therefore occupancy measures from that quarter are not comparable with those from previous quarters.

ABS PUBLICATIONS AND PRODUCTS

Statistics collected by the ABS are generally made available to clients in published form. Some, including those not published, are available in one or more of the following forms: microfiche, magnetic tape, computer printout, CD, floppy disk, photocopy and clerically extracted tabulation.

Current publications produced by the ABS are listed in the Catalogue of Publications and Products, Australia (1101.0). The ABS also issues on Tuesdays and Fridays a Publications Advice (1105.0) which lists publications to be released within the next few days. The Catalogue and Publications Advice are available from any ABS Office.

To receive ABS publications on a regular basis contact the ABS *Publication Mailing Service* on (008) 02 0608

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS office.

The ABS Information Consultancy Service has specialist staff to assist and advise clients with their statistical inquiries. For more detailed information about these services telephone the Information Officer on (08) 237

7100 or call at the ABS, 55 Curric Street or write to Information Service, ABS, GPO Box 2272, Adelaide 5001.

The ABS also provides a *Statistical Consultancy Service*, for expert assistance in survey, sample and questionnaire design, data collection, processing and analysis, and statistical modelling. For more information contact Gary Niedorfer, telephone (08) 237 7379.
